Abstract

In the recent past, stock market trading became one of the most important factors in a country. Colombo Stock Exchange (CSE) is the main stock exchange in Sri Lanka and All Share Price Index (ASPI) is a main index used by CSE. ASPI indicates the price fluctuations of all the listed companies and covers all the traded companies during a market day. The CSE market has been divided into 20 sectors, based on the nature of the business. Out of the 20 sector indices "Bank Finance and Insurance" (BFI) sector has become one of the most important and influential indicator on economy of Sri Lanka and it has a high influence on ASPI as well. Thus, forecasting ASPI and BFI is very important for the decision maker. Hence this study was carried out to study, the pattern of time series of ASPI and BFI and to forecast values of ASPI and BFI.

The data considered for this study was from 3rd January 2000 to 30th January 2009 which accommodate to 2177 daily data points in each index. The result found that the original ASPI series depicts a similar trend pattern to "S Curve". The SLR/US \$ Exchange Rate does not have an impact on ASPI. As a result a univariate time series Autoregressive Integrated Moving Average (ARIMA (2,1,2)) model was fitted to predict values of ASPI. The validity of the model was confirmed using various statistic tests. And found the predicted values of ASPI were below 5%. Thus, this model is recommended to forecast ASPI.

Thus, BFI sector has a high influence on ASPI with the most number of companies coming under it. Hence, tried to fit a combined model to predict values of BFI. The Granger causality test and cointegration test confirmed that BFI is influenced by 10 sector indices and with a lag length of 3 for each sector index. Hence, a Vector Autoregression (VAR) model was identified as the predictive model to forecast values of BFI. The percentage error for the forecasted values of BFI also varied between 0.44% and 4.83% ensuring the suitability of the model. Thus, this model is also recommended to forecast BFI.

Declaration

hereby certify that this dissertation entitled "*Time Series Analysis of All Share Price Index & Sector Indices*" does not incorporate, without acknowledgement, any material previously submitted for a Degree or Diploma in any University and to the best of my knowledge and belief, it does not contain any material previously published or written by another person or myself except where due reference is made in the text. I also hereby give consent for my dissertation, if accepted, to be made available for photocopying and for interlibrary loans, and for the title and summary to be made available to outside organizations.

Acknowledgement

It is with gratification that I take this opportunity to express my heartiest gratitude to all the well-wishers who helped me in formulating this project a success.

First of all, it is with great respect that I forward my extreme gratitude to my supervisor cum course coordinator Mr. T.M.J.A. Cooray, Head of Department of Mathematics. His guidance and attention towards success strengthened my potential to face all the hardships that came across while completing this study. His remarkable knowledge and infinite experience were the driving forces behind the achievement of my project. Words alone will not suffice to convey my gratefulness to him since he was sacrificing a great deal of his valuable time to provide me with relevant materials and all the advice to take this project to perfection. I'm lucky to receive his service throughout this study.

Further, I wish to express my appreciation to Dr. T.S.G. Peiris, Senior lecturer, Department of Mathematics, providing immense support and advice in completing the project successfully.

University of Moratuwa, Sri Lanka.
Electronic Theses & Dissertations

I acknowledge with thanks to all the lecturers and all the staff members in the Department of Mathematics, who helped me in numerous ways.

Again I wish to grant my sincere thanks to everyone who supported me to make this project a success.

Last but not least, I present my appreciation to my family and my friends who were behind me, encouraging and directing me towards the success of my project.

Dedicated to
Amma & Thaththa

Without your patience, understanding,

CHAPTER 3 Theory and Methodology	25
3.1 Price Indices of Colombo Stock Exchange	26
3.1.1 All Share Price Index	26
3.1.2 Sector Indices	27
3.2 Foreign Exchange Rate	27
3.2.1 SLR/US \$ Exchange Rate	27
3.3 Descriptive Statistics	27
3.3.1 Histogram of Residuals	28
3.3.2 Mean Absolute Percentage Error	28

3.3.3 Mean Absolute Deviation	29
3.3.4 Mean Square Deviation	29
3.3.5 Skewness	29
3.3.6 Kurtosis	30
3.3.7 Jarque-Bera Statistics	31
3.3.8 Normal Probability Plot	31
3.4 Time Series Analysis	32
3.4.1 Objectives of Time Series Analysis	33
3.4.2 Types of Variation in Time Series	34
3.4.3 Properties of Time Series	35
3.5 Univariate Time Series	42
3.5.1 Probability Models of Time Series	42
3.5.2 Box-Jenkins Methodology of Model Building	47
3.6 Multivariate Time Series	55
3.6.1 Cross Correlation	56
3.6.2 Granger Causality	57
3.6.3 Cointegration	58
3.6.4 Vector Autoregression	61

CHAPTER 4 Statistical Analysis Of ASPI 65

4.1 Description	66
4.2 Analyzing ASPI Data Series	66
4.2.1 Diagnostic Check of ASPI	66
4.2.2 Analyzing Time Series Plot of ASPI	68
4.2.3 Analyzing the Trend of ASPI	69
4.2.4 Obtaining ACF and PACF Graphs of Original Series	71
4.2.5 Obtaining ACF and PACF Graphs of First Difference Series	72
4.2.6 Unit Root Test for the First Difference Series of ASPI	73
4.3 Analyzing SLR/US \$ Exchange Rate Data Series	74
4.3.1 Diagnostic Check of SLR/US\$ Exchange Rate	75
4.3.2 Analyzing Time Series Plot of SLR/US \$ Exchange Rate	76
4.3.3 Analyzing the Trend of SLR/US \$ Exchange Rate	77
4.3.4 Obtaining ACF and PACF Graphs of Original Series	79
4.3.5 Obtaining ACF and PACF Graphs of First Difference Series	80
4.3.6 Unit Root Test for the First Difference Series of SLR/US \$ Exchange Rate	81
4.4 Examining the Combined Series - ASPI and SLR/US \$ Exchange Rate	82
4.4.1 Comparing the Trend Graphs of the Two Original Series	83
4.4.2 Obtaining the Cross Correlation of the Two Original Series	84
4.4.3 Granger Causality Test for the Two Original Series	84
4.4.4 Cointegration Test for the Two Original Series	85
4.5 Forming a Suitable Model to Forecast Values of ASPI	86

4.5.1	Box-Cox Transformation for ASPI	86
4.5.2	Time Series Plot of Transformed Data of ASPI	87
4.5.3	Obtaining ACF and PACF Graphs of Transformed Series	88
4.5.4	Unit Root Test for the First Difference of Transformed Series	90
4.5.5	Time Series Plot of First Difference of Transformed ASPI Series	91
4.5.6	ARIMA Model Selection for Transformed ASPI Series	92
4.6	Forming a Suitable Model to Forecast “Short Term” Values of ASPI	93
4.6.1	Diagnostic Check of Short Term ASPI Series	93
4.6.2	Analyzing Time Series Plot of ST-ASPI	94
4.6.3	Obtaining ACF and PACF Graphs of ST-ASPI Series	94
4.6.4	Obtaining ACF and PACF Graphs of First Difference Series	95
4.6.5	Box-Cox Transformation for ST-ASPI	96
4.6.6	Time Series Plot of Transformed ST-ASPI Series	97
4.6.7	Obtaining ACF and PACF Graphs of Transformed ST-ASPI Series	98
4.6.8	Obtaining ACF and PACF Graphs of First Differenced Transformed ST-ASPI Series	99
4.6.9	Unit Root Test for the First Difference of Transformed ST-ASPI Series	100
4.6.10	Time Series Plot of First Difference of Transformed ST-ASPI Series	101
4.6.11	ARIMA Model Selection for Transformed ST-ASPI Series	102
4.6.12	Diagnostic Check of the Selected Model	103
4.6.13	Testing the Significance of the Model	106
4.6.14	ARIMA(2,1,2) Model After Removing the Constant	106
4.6.15	Mathematical Formula of ARIMA(2,1,2) Model	109
4.6.16	Obtaining Forecasts for Transformed ST-ASPI	111
4.6.17	Obtaining Short Term Forecasts for ASPI	111

CHAPTER 5 Statistical Analysis Of BFI 113

5.1	Description	114
5.2	Analyzing BFI Data Series	114
5.2.1	Diagnostic Check of BFI	114
5.2.2	Analyzing Time Series Plot of BFI	116
5.2.3	Analyzing the Trend of BFI	117
5.2.4	Obtaining ACF and PACF Graphs of Original Series	119
5.2.5	Obtaining ACF and PACF Graphs of First Difference Series	120
5.2.6	Unit Root Test for the First Difference Series of BFI	121
5.3	Analyzing Other Sector Indices	122
5.3.1	Diagnostic Check of Other Sector Indices	122
5.3.2	Analyzing Time Series Plots of Other Sector Indices	123

5.3.3 Unit Root Test for the Original Series of Other Sector Indices	125
5.3.4 Unit Root Test for the First Difference Series of Other Sector Indices	125
5.4 Tests to Find the Relationship between BFI and Other Sector Indices	126
5.4.1 Pairwise Correlation of BFI with Other Sector Indices	126
5.4.2 Granger Causality Test for BFI and Other Sector Indices	126
5.4.3 Cointegration Test for BFI, BFT, C&P, INV, OIL, PLT, S&S, SRV, TRD, DIV and F&T	127
5.5 Obtaining a Suitable Model to Forecast Values of BFI Index	130
5.5.1 Obtaining VAR Lag Length	130
5.5.2 Obtaining VAR Model	131
5.5.3 Obtaining Forecasts for BFI	135
CHAPTER 6 Discussion and Conclusion	137
6.1 Discussion	138
6.1.1 Results of ASPI	138
6.1.2 Results of BFI	139
6.2 Conclusion	140
6.3 Suggestions for Further Work	140
References	141
Appendix	144
