Thesis/Dissertation submitted in partial fulfillment of the requirements for the degree  
Master of Science

Department of Electrical Engineering  
University of Moratuwa  
Sri Lanka

September 2013

## Declaration

“I declare that this is my own work and this thesis does not incorporate without acknowledgement any material previously submitted for a Degree or Diploma in any other University or institute of higher learning and to the best of my knowledge and belief it does not contain any material previously published or written by another person except where the acknowledgement is made in the text.

Also, I hereby grant to University of Moratuwa the non-exclusive right to reproduce and distribute my thesis, in whole or in part in print, electronic or other medium. I retain the right to use this content in whole or part in future works (such as articles or books).

Signature:

Date:

(T.M. Weerakkody)

The above candidate has carried out research for the Masters Dissertation under my supervision.

Signature of the supervisor:  
(Dr KTMU Hemapala)

Date

Signature of the supervisor:  
(Dr AGBP Jayasekara)

Date

## **Dedication**

This is my first research work which is successfully concluded and this will be dedicated to my wife Mrs. Nilanjana Senevirathne, who has been always supporting me to make my dreams come true.

## Acknowledgement

My heartiest gratitude is granted to Dr. Udayanda Hemapala who inspired me to start master level studies and guide me every step in which the research would be followed successfully and on the other hand, Dr. Buddika Jayasekara who has kept me on the track where conceptual directions were necessary to move forward and without his guiding, there won't be a research like this.

I acknowledge the staff of the University of Moratuwa electrical department, and the way in which lectures were conducted, are absolutely admirable. I believe that University of Moratuwa is one of my destinations where my entire life has been uplifted and is one of the greatest universities of the world.

And also acknowledge Mr. Sagara Gunawardana who was the managing director of Venora International Projects (pvt) Ltd. And his support and release my duties to attend all lectures and seminars. And my team members who came from different organizations with different kind of experience and expertise knowledge with which I had the opportunity to share.

Finally, I gratefully thank my parents who wish my success all the time. My family and friends who have shared ups and downs in my life evenly and the doctrine of load Buddha which I believe the only truth that people can survive and enlighten one day.

## Abstract

Construction Industry in Sri Lanka has started to boom from few years back and is going to reach its peak now, therefore, companies require to have more attention on bid estimation in terms of the accuracy and the competitiveness since there are lots of competitors who are always searching for winning their bids.

When it comes to electrical installation field, it is more complex and must be handled by experience quantity surveyor (QS) with a sound supervision from an electrical engineer so that requirements stipulated in the bidding documents are to be well-understood and quoted accordingly.

However the current issues are (i) all the electrical contractors cannot afford to have expertise knowledge on this context and even if had, cannot employ for continuous operation because it tends to reduce the accuracy level of the output.

(ii) Conventional estimation techniques are still not reviewed so that continuous improvements on techniques of bidding should be promoted so that introduction of more reliable system would be useful to reduce the complexity of bid estimation process and release the pressure on the estimator in turn. (iii) Application of software base expert systems is still not developed and not applied in the electrical installation perspective in Sri Lanka and implementing such a system should be considered to solve the matter efficiently.

Therefore this research will use expertise knowledge to build a knowledge base expert system and the same will be implemented in software base so that the end result is to overcome prevailing issues in electrical bid estimation in Sri Lanka.

# Table of Contents

Declaration.....	ii
Dedication.....	iii
Acknowledgement.....	iv
Abstract.....	v
Table of Contents.....	vi
List of Figures.....	vii
List of Tables.....	viii
Abbreviations.....	ix
Chapter 1: Introduction.....	1
1.1. Background.....	1
1.2. Problems of current approaches.....	5
1.3. Motivation.....	8
1.4. Objectives.....	9
1.5. Thesis Outline.....	9
Chapter 2: Expert Systems Approach for Electrical Estimation.....	10
2.1. Introduction to Expert Systems.....	10
2.2. Electrical Estimation by an Expert Systems.....	13
2.3. Development of the Knowledge Base.....	17
2.4. Development of the Inference Engine of the Expert System.....	18
Chapter 3: Software Development.....	29
Chapter 4: Competitive Bid Estimation.....	50
4.1. Application of the Expert System for Competitive Bid Estimation.....	50
4.2. Case studies for Electrical Estimation.....	50
4.3. Estimation Results and Discussion.....	51
4.4. Advantages of the Proposed System.....	53
Chapter 5: Conclusions.....	54
References.....	55
Appendix A: Case Study No 1	
Appendix B: Case Study No 2
