

**IMPROVEMENT OF RELIABILITY & LIFETIME  
OF OIL IMMERSED POWER TRANSFORMERS THROUGH  
CONDITION MONITORING**

Samarasinghe Arachchige Keerthi Priyananda Samarasinghe

(109250L)

Dissertation submitted in partial fulfillment of the requirements for the degree Master  
of Science

Department of Electrical Engineering

University of Moratuwa

Sri Lanka

May 2015

# Declaration

The work submitted in this dissertation is the result of my own investigation, except where otherwise stated.

It has not already been accepted for any degree, and is also not being concurrently submitted for any other degree.

S.A.K.P. Samarasinghe

Date:

I endorse the declaration by the candidate.

Prof. H.Y.R. Perera

| Declaration .....  | i    |
| Contents .....   | ii   |
| Abstract.....  | v    |
| Acknowledgement .....  | vi   |
| List of Figures.....   | vii  |
| List of Tables .....   | viii |
| List of Principal Symbols.....   | ix   |
| Chapter 01 .....   | 1    |
| Introduction .....   | 1    |
| 1.1    Introduction to research topic .....                            | 1    |
| 1.1.1    Research Problem.....   | 2    |
| 1.1.2    Research Objective .....                                      | 2    |
| 1.1.3    Methodology .....   | 2    |
| 1.2    Introduction to Power Transformers.....                         | 3    |
| 1.2.1    Components of a Power Transformer .....                       | 3    |
| 1.2.2    The Main Tank .....   | 3    |
| 1.2.3    Transformer Core.....   | 3    |
| 1.2.4    Winding.....  | 3    |
| 1.2.5    Tap Changer .....   | 4    |
| 1.2.6    Oil Conservator .....   | 4    |
| 1.2.7    Bushings .....  | 4    |
| 1.2.8    Moisture Breather .....                                       | 4    |
| 1.2.9    Insulating Oil.....   | 4    |
| 1.2.10    Insulating Paper .....                                       | 5    |
| 1.2.11    Cooling Mechanism.....                                       | 5    |
| 1.2.12    Other Components.....  | 5    |
| 1.3    Reliability of Power Transformers.....                          | 6    |
| 1.4    Lifetime of Power Transformers .....                            | 6    |
| 1.5    What is condition monitoring?.....                              | 6    |
| Chapter 02 .....   | 7    |
| Industry Related Problems.....   | 7    |
| 2.1    Transformer Faults and Failures.....                            | 7    |
| 2.1.1    Failure Rates of Transformers With respect to the age.....    | 8    |
| 2.1.2    Failure Rates of Transformers With respect to the Cause ..... | 9    |

|   |  |    |
|---|--|----|
| 2.1.3                                     | Transformer Failure Types .....                        | 10 |
| 2.2                                       | Lifetime reducing factors of a Power Transformer ..... | 10 |
| 2.2.1                                     | Measurement of Degradation.....                        | 11 |
| 2.2.2                                     | Degradation of Insulation Paper.....                   | 11 |
| 2.2.3                                     | Degradation of insulation oil.....                     | 12 |
| 2.2.4                                     | Overheating of Core & Winding.....                     | 13 |
| 2.2.5                                     | Abnormal Loading Patterns .....                        | 13 |
| Chapter 03                                | .....  | 14 |
| Condition Assessment Tests                | .....  | 14 |
| 3.1                                       | Introduction to Transformer Tests.....                 | 14 |
| 3.2                                       | Insulation oil testing .....                           | 14 |
| 3.2.1                                     | Visual Inspection of Oil Color .....                   | 14 |
| 3.2.2                                     | Moisture test (Conventional).....                      | 15 |
| 3.2.3                                     | Acidity test .....                                     | 17 |
| 3.2.4                                     | Breakdown Voltage .....                                | 17 |
| 3.2.5                                     | Furan Analysis.....                                    | 17 |
| 3.2.6                                     | Interfacial Tension (IFT) .....                        | 19 |
| 3.2.7                                     | Dissolved Gasses Analysis (DGA).....                   | 19 |
| 3.3                                       | Winding Testing.....                                   | 24 |
| 3.3.1                                     | Winding Resistance Test .....                          | 24 |
| 3.3.2                                     | Insulation Resistance (IR).....                        | 25 |
| 3.3.3                                     | Frequency Response Analysis (FRA) .....                | 26 |
| 3.3.4                                     | Partial Discharge Measurement (PD).....                | 28 |
| 3.4                                       | Selection of Suitable Tests.....                       | 28 |
| 3.4.1                                     | Moisture Test .....                                    | 28 |
| 3.4.2                                     | Frequency Response Analysis (FRA) .....                | 29 |
| 3.4.3                                     | Furan Analysis.....                                    | 29 |
| 3.4.4                                     | Dissolved Gasses Analysis (DGA).....                   | 29 |
| 3.4.5                                     | Acidity Test .....                                     | 29 |
| Chapter 04                                | .....  | 30 |
| Pre Qualification Tests and Fitness Tests | .....  | 30 |
| 4.1                                       | Pre-qualification tests .....                          | 30 |
| 4.1.1                                     | Analysis for Moisture in Oil and Test Results .....    | 30 |
| 4.1.2                                     | Analysis for Moisture in Paper and Test Results.....   | 32 |
