DISSERTATION

**SUBMITTED IN PARTIAL FULFILMENT OF THE REQUIREMENT OF
MASTER OF SCIENCE DEGREE IN OPERATIONAL RESEARCH**

DEPARTMENT OF MATHEMATICS

UNIVERSITY OF MORATUWA

SRI LANKA

AUGUST 2014

DECLARATION OF THE CANDIDATE

I hereby certify that this dissertation does not incorporate acknowledgement of any material previously submitted for a degree or diploma in any university, and to the best of my knowledge and belief it does not contain any material previously published or written by another person or myself except where due reference is made in the next text.

K.R.S. Koswatte

(09//8456)

Date

DECLARATION OF THE SUPERVISOR

I hereby certify that I have supervised and accepted this as the dissertation for the partial fulfilment of the requirement for the master in science degree in operational research.

T. M. J. A. Cooray

(Supervisor)

Senior Lecturer

Department of Mathematics,

Faculty of Engineering,

University of Moratuwa.

DEDICATION

This dissertation is dedicated to you all, with love, who works, worked and will work
for the wellbeing of all beings.

ACKNOWLEDGEMENT

I offer my enduring gratitude to the faculty, staff and my fellow students at University of Moratuwa, who have inspired me to work in this field. I owe particular thanks to Mr.T.M.J.A. Cooray, whose guidance made me to achieve this task of start and complete the project, without his inspiration I would not have completed this in very busy times of my life.

Special thanks are owed to my parents, who have supported me throughout my years of education, both morally and financially. I should memorize my father respectfully who is now not with us but was the only person who dedicated his whole life for the wellbeing of our family. My mother who is my first teacher should get the awards of what I do as she made me what I am with her love and care. Thank you mother for loving all the children in the country and dedicating your 40 years to your duties in schools and made those parents bless us all.

My brothers and sisters gave me the innermost support, which made my life easier and relaxed in all the troubles I had during my studies. I am indebted to you, which I could never pay.

As well, my gratitude is to be given to my teachers at Pinnawala Central Collage-Rambukkana, President's Collage-Maharagama, Sri Sumana Vidyalaya-Palukadawala-Galgamuwa, and St. Coomb's Collage-Thalawakelle.

I thank all, who made me achieve this task knowingly or unknowingly in any other means and I really apologize for not including their names under this specifically. Specially the hundreds of my friends who supported in many ways to make my life easier and happier throughout the life journey are fondly remembered.

ABSTRACT

Multi-index assignment problems were introduced as a natural extension of linear assignment problems. It seems that this would be a new branch of methods that could be used for solving Multi Index Assignment Problems.

In this study, a method is introduced to solve the multi index assignment problems, where the method is very similar to Hungarian method. The name “Multidimensional Array Solving Algorithm” (MASA) is used for the algorithm presented here. As the name implies the method could be used to solve problems related to multi-dimensional assignment problems. This method would be very useful when applying to practical computing problems. Even though the example is used for a three dimensional assignment problem, it could be extended to higher order assignment problems and applied to many situations with slight modifications. However, this part is not studied yet and may have lot of different variations.

MASA is also used to develop the algorithm of the software developed under the project. The database desktop application named as the timetable manager is developed with use of object oriented programming. The same application is applied to solve the example. Depending on the number of resources or objects in a dimension, the solving time would increase rapidly. However, due to line and matrix operations, the running time possibly could be reduced.

TABLE OF CONTENTS

Declaration of the Candidate	ii
Declaration of the Supervisor	iii
Dedication	iv
Acknowledgement	v
Abstract	vi
Table of Contents	vii
List of Tables	ix
List of Figures	xi
Abbreviations	xii
1. Introduction.....	1
1.1 Problem Definition and Background.....	1
1.2 Objectives.....	2
1.3 Scope of Project	2
1.4 Significance of Project	3
1.5 Content of Dissertation.....	3
2. Literature Review.....	5
2.1 Linear Assignment Problems	5
2.2 Quadratic Assignment Problems	6
2.3 Multi-index Assignment Problems	6
2.4 Exact & Experimental Solution Methods.....	7
2.5 Software Implementation of LAP and MAP Optimization.....	7
3. Methodology	9
3.1 Linear Assignment Problems (LAP).....	9
3.2 Problem Definition for LAP.....	9
3.3 Algorithms for LAP	9
3.4 Hungarian Method for LAP	10

3.5	Multi- index Array Solving Algorithm (MASA) for Multi-index assignment problems	10
3.6	Problem Definition for MAP	11
3.7	Three Dimensional Assignment Problems	12
3.8	Multi-index Array Solving Algorithm (MASA)	13
3.9	Time table manager Software Architecture	15
4.	Analysis.....	17
4.1	Example of Solving 3-PAP with MASA	17
4.2	Solving with Excel Solver using Simplex Method	47
4.3	Example by Simulating the Application	51
5.	Conclusion	66
5.1	Comparison of MASA with Other Methods for Solving MAPs.....	66
5.2	Limitations of MASA.....	68
5.3	Future Developments & Recommendations	69
	Bibliography	71
	Appendix A- Important Coding in The Timetable Manager	73
	Appendix B-Software implementations for the Hungarian algorithm.....	124

ABBREVIATIONS

3-D - 3 Dimensional

3-DAP - Three Dimensional Assignment Problems

3-PAP - Planner 3 Dimensional Assignment Problems

LAP - Linear Assignment Problem

LBAP - Linear Bottleneck Assignment Problems

LSAP - Linear Sum Assignment Problem

MAP - Multi-Index Assignment Problem/Multi-Dimensional Assignment Problems

MASA – Multi-index Array Solving Algorithm

NP - Non-deterministic Polynomial-time hard

OP - Operations Plane

QAP - Quadratic Assignment Problem
