

**FORMULATION OF DESIGN STRATEGIES  
OF URBAN NODES IN STRENGTHENING THE IMAGEABILITY OF A CITY  
WITH SPECIAL REFERENCE TO COLOMBO FORT**

78 "03"  
711.41 (SAB.2)

A history of architecture and social studies essay presented

To

The department of architecture

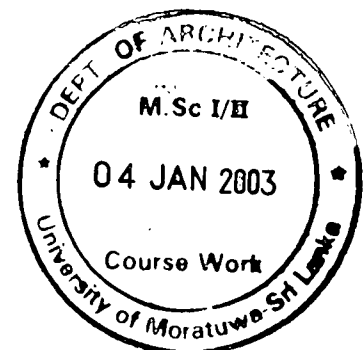

University of Moratuwa

For the examination in M.Sc. (Arch)

University of Moratuwa

79009

Dayaratne H.L.N.Diluk.

December 2002- 2003

**Acknowledgment**

## Acknowledgment

Completion of this study would not have been possible if not for the help of many, who supported both physically and morally. Therefore I would like to express my thanks to the following persons who assisted me in numerous ways.

- Archt. Madura Prematilaka, Senior Lecturer and Archt. Kapila De Silve, Lecturer, Dept. of Architecture, University of Moratuwa for the necessary guidance given to start and carry on the study.
- Archt. Wasana wijesinghe, Lecturer, Dept. of Architecture, University of Moratuwa for being behind and guide throughout the process.
- Dr. R. Emmanuel, Lecturer, Archt. Prasanna Kulathilake, Lecturer, Archt. Jagath Munasinghe, Lecturer and Mr. K.D. Fernando lecturer Dept. of Architecture, University of Moratuwa, for the voluble comments they provide.
- Archt. Prasanna Wijjethunga and Archt. Anjana, Urban Development Authority, for voluble information and debatable ideas.
- Mr. D.S. Gunaratne, Presidential Assistant Secretary, O.I.C. Jayantha Seneviratne, O.I.C Suresh Warnasuriy, for their assistants given to me when taking photographs in Colombo Fort.
- My parents, Aparna, Manohari, Ganga and Malinda Ayya for providing me with all the support to carryout my entire task without any laps.
- For whose names are not listed, who helped me in so many ways.

## **Contents**

<b>Acknowledgement</b>	I
<b>List of Illustrations</b>	II
<b>Introduction</b>	01
<b>Chapter one: City as an Imageable place</b>	
1.1 The city	06
1.2 The image of the city and its characteristics	07
1.2.1 Structure	07
1.2.2 Meaning	09
1.2.3 Identity	09
1.3 Imageability of a city	10
1.4 Imageable structure of the city	12
1.5 Image making physical elements of a city	12
1.5.1 Paths	13
1.5.2 Edges	13
1.5.3 Districts	14
1.5.4 Nodes	14
1.5.5 Landmarks	14
1.6 Significance of nodes in strengthening the image of the city	15
<b>Chapter two: Urban Nodes</b>	
2.1 The concept of node	17
2.1.1 Nodes in general	17
2.1.2 Node in the subject of urban design	17
2.2 Urban nodes and their characteristics	20
2.2.1 Physical character	21
2.2.1.1 Shape	21
2.2.1.2 Form	22
2.2.1.3 Composition.	22
2.2.2 Functional character	23
2.2.3 Symbolic Character	25

## **Chapter three: Typology and Design dimensions of Urban Nodes**

3.1 Typology of Urban Nodes	27
3.1.1 The main typology	28
3.1.1.a Squares	29
3.1.1.b Junctions	31
3.1.1.c City edges	31
3.1.2 Sub Typology	32
3.1.2.a Enclosed node	33
3.1.2.b The Dominated node	34
3.1.2.c The centralized node	35
3.1.2.d. The Grouped node	36
3.1.2.e Amorphous node	37
3.2 Design Dimensions of Urban Nodes	37
3.2.1 Imageable structure of an urban node	37
3.2.1.a The center	38
3.2.1.b The enclosure	38
3.2.1.c Continuity	39
3.2.2. Components of an imageable structure of an urban node	39
3.3. Formulation of design dimensions for strengthening the imageable structure of urban nodes	39
3.3.1. Formulations of design dimensions for physical attributes of the structure of urban nodes	40
3.3.1.1 Roads or streets	40
3.3.1.1.a Road network	40
3.3.1.1.b Junctions	42
3.3.1.2. Built fabric	42
3.3.1.2.a. Proportions	42
3.3.1.2.b Three-dimensional modeling of a building	43
3.3.1.2.c Architectural unity	43

3.3.1.2.d. Façade treatment of surrounding built fabric	44
3.3.1.2.e. Roofline	44
3.3.1.2.f Directional quality	45
3.3.1.2.g. Corner treatment of buildings around nodes	45
3.3.1.2.h Building line	46
3.3.1.3. Natural features	46
3.3.2 Design dimensions for qualitative attributes of the structure of urban nodes.	47
3.3.2.1 Identification of node	47
3.3.2.2. Integration of node	47

**Chapter four: Formulation of designs strategies for  
urban nodes in the city of Colombo**

4.1 Historical evolution of Colombo fort and its contribution to the Imageability of the city	48
4.2 Selected case studies in Colombo Fort	53
4.2.1 Cargills Junction, Node	54
4.2.2 Marine Drive edge, Node	61
4.2.3 Gold face Green, Node	68
<b>Findings of the Questionnaire</b>	73
<b>Conclusion</b>	75
<b>Bibliography</b>	78

## List of Illustrations

## List of Illustrations

Fig. 1	City of Sanfrancisco City	06
Fig. 2	Group of squares in Bath, Rome unique in the relationship between space, and the surrounding buildings	17
Fig. 3	Urban Node in Prais Urban node as a foci, junction, center or convergence of path.	18
Fig. 4	Node as a conceptual anchor point.	18
Fig. 5	St. Marks square, Venice has a great civic composition.	18
Fig. 6	Piazza Mignaaelli, Rome an activity node	19
Fig. 7	Piazza del Popolo, Rome. Node become significant in the heart of the Rome.	19
Fig. 8	Mecca, Saudi Arabia.	19
Fig. 9	Shushtar, Iran. Node has a potential to grow and end up as a city center.	20
Fig. 10	Basic shapes of urban node.	21
Fig. 11	St. Peter's Rome.	22
Fig. 12	Lucca in Tuscany, Rome. a residential node.	23
Fig. 13	Pizza Venezin, Italy Administrative node.	23
Fig. 14	Brussel square, Belgium. Functioning as great social spaces.	24
Fig. 15	Trade node in South Africa.	24
Fig. 16	Macca, Saudi Aeabi. Nodes become the focus and symbol of an important region.	25
Fig. 17	Compidoglio, Rome.	29
Fig. 18	Basic shapes of squares	30
Fig. 19	Junction in Bath. A strong pattern of streets and junction.	31
Fig. 20	The modern junctions are purely designed for it's primary function, traffic movement.	31
Fig. 21	Charles river, Boston.	32
Fig. 22	Place Des Voges, Paris. An ideal example for an enclosed node.	33
Fig. 23	Piazza del Compo.	33
Fig. 24	Zocala plaza, Maxico. The node itself has lost it sense of enclosure due to failing of corner treatments.	33
Fig. 25	Plan of Piazza Santa Croce, Florence.	34
Fig. 26	Piazza Santa Croce.	34
Fig. 27	Spanish steps, Rome.	34
Fig. 28	The gateway of India.	35
Fig. 29	Place de l'Etoile, Parise	35
Fig. 30	Kaba in Macca. The center or the nuclear object is the shrinewhich symbol of god.	35
Fig. 31	Plan of Piazza Della Siggnoia, Florence	36
Fig. 32	Palazzo Vecchio, Piazza Della Signoria, Florence.	36
Fig. 33	Darban South Africa.	37

Fig. 34	Permeability to the square	41
Fig. 35	Basilica Santissima Annunziata, Florence.	44
Fig. 36	Façade treatment	44
Fig. 37	Roofline.	44
Fig. 38	Roofline.	44
Fig. 39	Node at Bath,	45
Fig. 40	Corner treatment of Seylan Bank Fort	45
Fig. 41	Building Line.	46
Fig. 42	The main market square of San Giorgio Morgeto.	46
Fig. 43	Duomo Florence.	47
Fig :44	the Portuguese Fort	50
Fig: 45	the Dutch Fort	50
Fig 46	the British Fort	50
Fig. 47	Land use map Colombo fort.	51
Fig. 48	The existing three dimensional image of Colombo.	52
Fig. 49	Plan, Colombo Fort.	53
Fig. 50	Building forms the shape of the node.	54
Fig. 51	Cargills Millers and Saylan bank.	54
Fig. 52	Greendlays Bank and Hemas building.	54
Fig. 53	Lack of sence of enclosure.	55
Fig. 54	Less contribution to the eds.	55
Fig. 55	Void areas decrease the degree of visual completeness	55
Fig. 56	Shows the bad skyline.	56
Fig. 57	Horizontal rhythm in Colonial buildings.	56
Fig. 58	Facades rythem totally fail in the Greendlays Bank.	56
Fig. 59	Shopping arcades.	57
Fig. 60	Continues arcades of the Cargills and Millers.	57
Fig. 61	Hamas building.	57
Fig. 62	Edges of the buildings forms the shape of the node.	58
Fig. 63	Façade continuation	59
Fig. 64	Existing height and breath ratio.	59
Fig. 65	Extending the building or the building elements to reduce the breath of the road.	60
Fig. 66	Provide a element to focusing of views.	60
Fig. 67	New archways to alleyways	60
Fig: 68	Marine drive edge-node (Lighthouse to Sama Chaithya)	61
Fig. 69	Sambodhi chaithya	62
Fig. 70	Light house	62
Fig: 71	The abandoned buildings along the landside boundary.	63
Fig. 72	The abandoned buildings along the landside boundary.	63
Fig: 73	The gaps between existing buildings loose the continuity of the edge.	63
Fig. 74	Edge of the historic core.	64
Fig. 75	Boundary walls along the road	64
Fig. 76	Open strip in-between road and sea.	65
Fig. 77	The stretch can be developing as a linear town park.	65
