Declaration of the candidate & Supervisor

“I declare that this is my own work and this thesis/dissertation does not incorporate without acknowledgement any material previously submitted for a Degree or Diploma in any other University or institute of higher learning and to the best of my knowledge and belief it does not contain any material previously published or written by another person except where the acknowledgement is made in the text.

Also, I hereby grant to University of Moratuwa the non-exclusive right to reproduce and distribute my thesis/dissertation, in whole or in part in print, electronic or other medium. I retain the right to use this content in whole or part in future works (such as articles or books).

Signature:

Date:

The above candidate has carried out research for the Master's thesis/Dissertation under my supervision.

Dedication

I dedicate my dissertation work to family. A special feeling of gratitude to my loving wife, Sandamali whose words of encouragement and push for tenacity ring in my ears. My Parents, M.A.Jayalath and W.Seelawathie and my sister, Priyanwada Jayalath have never left my side and are very special.

I also dedicate this dissertation to my mother and father in law, Heny Gunarathe and Leela Gunarathne who have supported me throughout the process.

Acknowledgement

My heartfelt gratitude is extended to the supervisor of my thesis, Eng. Kithsiri Samarasinghe for the immense support and encouragement given throughout the project. His perfect guidance and strength given during the research period is remembered with great respect. A special thank goes to our MSc coordinators Dr.Chandika Wewagedara and Dr.Ajith Pasqual for the guidance given.

Further I would like to thank Mr.Sanath Siriwardana of TRCSL and Mr.Mahinda Kandapahala of ICTA for the valuable time he allocated for me for the interview conducted and also the valuable information shared during the interview.

My thesis won't be successful without the feedback for the questionnaire which was administered among set of engineers. I take this moment to thank them.

Abstract

Objective of this study was to propose a set of national broadband strategies that suits to Sri Lankan context. Strategic planning process is used as the model to build up national broadband strategies. Initial step of the model is to set some strategic objectives. Therefore, set of strategic objectives, goals, targets for broadband were proposed. It is required to conduct an environmental scanning process which can be used to identify internal and external factors of the broadband environment. Environmental scanning process was done by a questionnaire which was administered among industry personnel and also the face to face interviews were carried out with government body personnel which represented from TRCSL and ICTA. Interviews which were carried out, revealed about existing broadband strategies and also the national broadband policy which has been drafted by a committee of broadband experts. Then the set of broadband plans were formulated and proposed and output of literature was used a platform to build up broadband plans. Literature survey was carried as an analysis of approaches that leading countries have taken in expanding their broadband markets, with a focus on the Republic of Korea. In addition, case studies covered Finland, France, Japan and the United States. Another case study of broadband implementation of Nigeria was also discussed in literature survey. Then this study revealed some set of broadband initiatives and policies that can be aligned with broadband plans. Those initiatives and policies are validated by the outcome of the literature survey and the discussion which had with government body personnel.

Key words:

Broadband initiatives, broadband plans, broadband policies, environmental scanning, strategic objectives, strategic planning process
