

LB/DCN/87/03

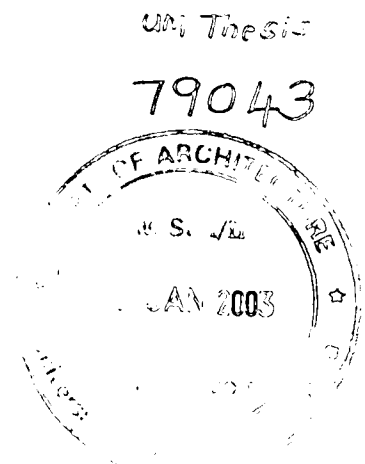

**A study of Urban Dwellings on Comfort and Spatial Quality with
Special reference to
Architectural Interventions for Natural Ventilation**

A Dissertation presented to the Department of architecture
University of Moratuwa as a subject of
 University of Moratuwa, Sri Lanka
MSc (architecture)
and for the
Royal institute of British architects
for the R.I.B.A. part ii

72 " 03"
72.01:697.1

Acknowledgements

Acknowledgments

I bow respect and gratitude to the many who guide, advice encourage and inspire me in the course of making this research.

I am grateful my supervisor Dr. Rohinton Emmanuel, senior lecturer, Department of architecture for his encouragement guidance and critical evaluation through my research work.

Arct. Vijitha Basnayaka, senior lecturer, Department of architecture, for recognizing me and giving necessary nourishment with his valuable advise and allowing me to take data from houses designed by him, and getting permission from house owners for my case studies to the completion of study.

Mr. Chathura  Masakorala, Technician, Department of Architecture, for the valuable contribution providing me all the measuring instruments and helping in my research work.

To all my friends of "Bavana", kowshi, Nuwan, Kumudu, Thanuja, Prasad, Jeewanthi, Madavi, Shamika, and suranga who help me in many ways to find very valuable information with their continuous encouragement to bring the research up to this stage.

Last but not least my gratitude goes to my parents.....

Contents

Acknowledgement	ii
List of illustrations	iii
Contents	vii
Introduction	1-5
Issue	2
Rational of the study	3
Aims and Objectives	4
Method of study	5
Scope of study	5
Chapter 01: "Urban house" as a Manifestation of climate caused artifact.	6-20
1.1. Urban residential development.	7
1.1.1. evolution of house	7
1.1.2. climate and need for shelter	10
1.1.3. house form of the present sri lankan context	11
1.2. Language of Architecture and expressions	14
1.2.1. The quality of space and architectural expressions	16
1.2.2. Components of space and its qualities	17
1.2.2.1. Opening of spaces	17
1.2.3. Architecture and its contribution on architectural expressions and quality.	18
1.2.2.2. Proportion in details	19
1.2.2.3. Scale	20
Chapter 02: "Comfort" and incidence of aerodynamics as moderator.	21-40
2.1. An introduction to climate studies	22
2.1.1. Climate and designer's task	23
2.1.2. Thermal comfort	24
2.1.3. Factors effecting thermal comfort	25
2.1.4. Thermal comfort and building form	25
2.2. Ventilation	27
2.3. Ventilation in theoretical basis	28
2.3.1. Health ventilation.	29
2.3.2. Comfort ventilation.	29
2.3.3. Structural ventilation.	31

2.4. Principles of air movement.	31
2.4.1. Stacked effect	32
2.4.2. Wind effect.	33
2.4.3. Orientation	33
2.4.4. Topography and context.	34
2.4.5. External features.	35
2.4.6. Cross ventilation.	35
2.4.7. Openings.	36
2.4.8. Use "open plan" interior to promote interior air flow.	39
2.4.9. The use of roof to the ventilation system	40
Chapter 03: Methodology of appraisal	41-49
3.1. Procedures and method of using	43
3.1.1. Dry bulb temperature	43
3.1.2. Wet bulb temperature	43
3.1.3. Relative humidity	43
3.1.4. Thermal humidity index	44
3.2. Strategies and devices to achieve comfort through architecture	45
3.2.1. Orientation	46
3.2.2. Roof and walls	46
3.2.3. Landscape	47
3.2.4. Materials used	48
Chapter 4: Review of architectural intervention for comfort and spatial quality for Urban houses of Colombo	50-62
4.1. Cases	51
4.1.1. Miss. Mauli de Seram house at Battharamull	52
4.1.2. Mr. and Mrs. P.Basnayaka house at Borrella	55
4.1.3. Mr. and Mrs. Choola Jinadasa house at Kirillapona	58
4.1.4. Mr. and Mrs. Jayasiri Karunanayaka house at Koswattha, Nawala	60
Conclusion:	63-70
• Design implications	67
• Future directions	69
Bibliography	71
Appendix
