Title of Project	<i>Examination Management System</i>		
Executive Summary	<i>This project is about proposing an examination management system (EMS) for National Institute of business Management (NIBM). NIBM is a higher educational institutes which conduct IT and management oriented courses from foundation level to higher diploma level. Examination Management system is proposed to reduce the time wastage on examination related activities and perform examination activities more comfortable way. Proposed solution consists of six main modules as exam scheduling, exam registration, result view, select awardees, transcript request online and exam result analyses. Web based examination system is used by three main users such as student, exam unit and lectures.</i>

01	<p>Introduction to the project</p> <p>This project is about introducing an examination management system for National Institute of business management. This examination management is used to manage examination activities more effectively.</p>
02	<p>Problem domain and motivation</p> <p>NIBM examination system is not computerized. So it wastes the time of student, lecturers and examination staff on examination activities. As a student of NIBM I also faced the problem regarding examinations. Because of that reason I am motivated to start this project on finding a solution.</p>
