Declaration of the candidate & Supervisor

Name : **J.A.Geeth Maduranga**
Student Number : **119064E**
Supervisor : **Mrs.Vishaka Nanayakkara**

The dissertation was submitted to the Department of Computer Science & Engineering of the University of Moratuwa for the partial fulfillment of the degree of Master of Business Administration in Information Technology

The dissertation work has not been submitted for any other academic qualification at any institution and I certify that there is no plagiarized work of other people and the whole process of preparing this document was done by me.

Acknowledgement

This dissertation is the final requirement of the research project of the Master of Business Administration in Information Technology (MBA-IT) program conducted by the Department of Computer Science and Engineering of the University of Moratuwa.

For the fulfillment of this research requirement, the very first and special thanks should be given to my supervisor Mrs.Vishaka Nanayakkara whose persistent support, guidance, commitment, and expert knowledge were supportive to complete the thesis and without which the project would not have been success. Further, I must thank Mrs.Ravindhi Jayasundara who supported me in analyzing data according to the proper statistical methods. Her support given to me at the analysis stage was very useful for the completion of the research.

Secondly, I take this opportunity to thank our MBA program coordinator and the department head Dr.Chandana Gamage who has given me guidance and support throughout the two years period of study. In addition to that, I must thanks for all the lecturers who shared their experience and knowledge which was a support for improvement in different knowledge areas. Further, the administrative staff of University of Moratuwa who gave their fullest support and contribution for creating a better learning environment. I must thanks the kind assistance provided by Prof.Chandra Gunawardane in creating the main objectives of the research and the guidance given for finding out the quality researches in the area of secondary education. The assistance given by the Librarian of the Open University of Sri Lanka, through her support, is also acknowledged herewith.

The MBA and its research component would not have been a success if support was not given by my mother, father, wife, and mother-in-law. They were always behind me in supporting in different ways to complete the MBA program. I would like to acknowledge the assistance given by all National Online Distance Education Service (NODES) Centre staff, school principals and teachers, friends living in all provinces,

Education for Knowledge Society Project (EKSP) staff, schoolNet staff, and the staff of the Chartered Institute of Sri Lanka in collecting data from all provinces of the country. Special thanks for collecting data should be given to Ven.Yalwela Phanyasekara (President of the Teachers' Union in Sri Lanka) and his support staff for the assistance given through his contacts with teachers in the country.

Finally I must grateful to my colleagues of the MBA-IT 2011 batch whose shared their experience in completing the research project, and Aruna Alwis (secretary/CEO), Sanajaya Senarathne (Administration/HR Manager) and Thusitha Liyanagamage (Manager Examination) of Institute of Chartered Accountants of Sri Lanka (ICASL) who granted/ approved study leave to complete the research before the target date.

Table of Contents

| | |
|--|-----|
| CHAPTER 01 | 1 |
| 1.0 Introduction and Research Background | 1 |
| 1.2 Problem Statement | 2 |
| 1.3 Research Objectives | 3 |
| 1.4 Thesis Organization | 4 |
| CHAPTER 02: Literature Review | 6 |
| 2.0 Introduction | 6 |
| 2.1 Available IT Tools and Facilities in schools | 6 |
| 2.2 IT Tools that can be used for the Teaching and Learning Process | 11 |
| 2.3 Advantages of Using IT Tools | 13 |
| 2.4 Barriers to Using IT Tools | 15 |
| 2.5 Technology Acceptance Model | 19 |
| 2.6 Acceptance by Stakeholders | 22 |
| CHAPTER 03: Research Methodology and Design | 25 |
| 3.1. Introduction | 25 |
| 3.1.1 Introduction to TAM for Use of IT in the Teaching Learning Process | 25 |
| 3.2 Sampling method and population | 29 |
| 3.2.1. Population | 29 |
| 3.2.2. Sample and Sampling Method | 29 |
| 3.3 Data collection method and questionnaire design | 31 |
| 3.3.1 Questionnaire Design | 31 |
| 3.2 Data collection | 32 |
| 3.4. Conceptual Research Framework | 42 |
| 3.5 Operationalization of the Variables | 43 |
| CHAPTER 04: Data Analysis and Interpretation | 51 |
| 4.1 Perceived Usefulness | 52 |
| 4.2 Perceived Ease of Use | 72 |
| 4.3 Attitude Towards IT use | 102 |
| 4.4 Intention to Use and Actual System Use | 122 |
| 4.5 Analysis of the relationship to the TAM variables | 145 |
| 4.6 Interview Based Analysis | 151 |

| | |
|---|-----|
| CHAPTER 05: Conclusion and Recommendation | 155 |
| 5.1 Conclusion..... | 155 |
| 5.1.1 Conclusion for TAM variables | 155 |
| 5.1.2 Conclusion for objectives..... | 164 |
| 5.2 Recommendations | 174 |
| Reference List..... | 179 |
| Appendix | 182 |
| 1.1 Instruction sheet for online questionnaire | 182 |
| 1.2 Questionnaire: | 184 |
| 1.2.1 Non IT teachers' Questionnaire English Medium | 184 |
| 1.2.2 IT Teachers' Questionnaire English medium | 189 |

List of Tables

| Table No | Table Name | Page No. |
|----------|---|----------|
| 3.1 | Government schools and teachers in schools in each province | 33 |
| 3.5.1 | Non IT Teachers' Questionnaire: Variables mapped with the questions | 47 |
| 4.1.1.1 | Cross Tabulation and Test of Association – Time Saving | 52 |
| 4.1.1.2: | Cross Tabulation and Test of Association – Sufficiency of time | 54 |
| 4.1.1: | Response rates - Time factor | 54 |
| 4.1.2.1: | Cross Tabulation and Test of Association – Quality Improvement in Teaching | 56 |
| 4.1.2.2: | Cross Tabulation and Test of Association – Quality Improvement in Learning | 57 |
| 4.1.6: | Response rates - Quality factor | 58 |
| 4.1.3.1 | Cross Tabulation and Test of Association – level of efficiency improvement | 59 |
| 4.1.3.2: | Cross Tabulation and Test of Association – level of productivity improvement | 60 |
| 4.1.3.3: | Cross Tabulation and Chi Square – level of utilization of available IT tools | 61 |
| 4.1.3.4: | Cross Tabulation and Test of Association – level of performance improvement of teachers | 63 |
| 4.1.3: | Response rates - Productivity factor | 64 |
| 4.1.3.5 | Level of utilization of IT tools-Province- wise distribution | 65 |
| 4.1.4.1: | Cross Tabulation and Test of Association – level of career development | 66 |
| 4.1.4.2: | Cross Tabulation and Test of Association – level of self-development | 67 |

| | | |
|----------|---|----|
| 4.1.4.3: | Cross Tabulation and Test of Association – level of improvement in IT in schools | 68 |
| 4.1.4.4: | Cross Tabulation and Test of Association – level of career development of students in the future. | 69 |
| 4.1.4: | Response rates - Development factor | 70 |
| 4.1.4.5: | Level of IT improvement in schools having more than 2000 students | 71 |
| 4.2.1.2: | Cross Tabulation and Test of Association– level of efficiency improvement of teachers. | 73 |
| 4.2.1: | Response rates- Self-Efficacy factor | 73 |
| 4.2.2.1: | Cross Tabulation and Test of Association – level of failures of IT tools. | 74 |
| 4.2.2.2: | Cross Tabulation and Test of Association– duration taken to fix the issues. | 76 |
| 4.2.2.3: | Cross Tabulation and Test of Association– level of support provided by the government. | 77 |
| 4.2.2: | Response rates - Failures of IT Tools factor | 78 |
| 4.2.2.4 | Failures of IT tools- schools which has >1000 students and <200 students | 79 |
| 4.2.3.1: | Cross Tabulation and Test of Association– level of confidence of teachers in using IT tools | 80 |
| 4.2.3.2: | Cross Tabulation and Test of Association– level of confidence of teachers in using IT tools. | 81 |
| 4.2.3: | Response rates - Anxiety factor | 82 |
| 4.2.3.3: | Response rate-Non IT Teachers who has not followed IT courses | 83 |
| 4.2.4.1: | Cross Tabulation and Test of Association – Agreement with “use of IT tools enhance the knowledge” | 84 |
| 4.2.4.2: | Cross Tabulation and Test of Association – level of internet usage of teachers | 88 |
| 4.2.4.3: | Cross Tabulation and Test of Association – level of | 86 |

| | | |
|----------|---|-----|
| | internet usage of students | |
| 4.2.4.4: | Cross Tabulation and Test of Association – level of competency in solving IT issues | 87 |
| 4.2.4.5: | Cross Tabulation and Test of Association – Level of IT knowledge of teachers | 89 |
| 4.2.4.6: | Cross Tabulation and Test of Association – level of IT knowledge of students | 90 |
| 4.2.4: | Response rates - IT Competency/Knowledge factor | 91 |
| 4.2.5.1: | Cross Tabulation and Test of Association – level of government support for training | 93 |
| 4.2.5.2: | Cross Tabulation and Test of Association – level important of training for teachers | 95 |
| 4.2.5.3: | Cross Tabulation and Test of Association – level IT training affect on the use of IT tools | 96 |
| 4.2.5: | Response rates - IT Competency/Knowledge factor | 97 |
| 4.2.6.2: | Cross Tabulation and Test of Association – level of difficulty of using IT tools | 98 |
| 4.2.6.3: | Cross Tabulation and Test of Association – level of likeness of students in using IT tools | 100 |
| 4.2.6: | Response rates - User Friendliness factor | 100 |
| 4.3.1.2: | Cross Tabulation and Test of Association – level of cost effectiveness of IT investment | 103 |
| 4.3.1: | Response rates - Economic factor | 103 |
| 4.3.2.1: | Cross Tabulation and Test of Association – What society believes on the use of IT tools | 105 |
| 4.3.2: | Response rates - Social Influence factor | 105 |
| 4.3.3.1: | Cross Tabulation and Test of Association – teachers believe the use of IT tools is effective | 106 |
| 4.3.3.2: | Cross Tabulation and Test of Association – Teachers believe that "Use of IT tools is effective than the traditional method. | 108 |

| | | |
|----------|---|-----|
| 4.3.3: | Response rates - Belief factor | 108 |
| 4.3.4.2: | Cross Tabulation and Test of Association – level of fear reduced due to English | 110 |
| 4.3.4: | Response rates - Fear on Technology factor | 111 |
| 4.3.5.1: | Cross Tabulation and Test of Association – level of achievement of teachers’ work | 112 |
| 4.3.5.2: | Cross Tabulation and Test of Association – Teachers like to use IT tools | 113 |
| 4.3.5.3: | Cross Tabulation and Test of Association – level of satisfaction in using IT tools | 114 |
| 4.3.5: | Response rates - Satisfaction factor | 115 |
| 4.3.6.1: | Cross Tabulation and Test of Association – level of achievement in international standards | 117 |
| 4.3.6.2: | Cross Tabulation and Test of Association – level of knowledge of English | 118 |
| 4.3.6.3: | Cross Tabulation and Test of Association– level of knowledge of English of teachers | 119 |
| 4.3.6: | Response rates - Globalization factor | 120 |
| 4.4.1.1: | Cross Tabulation and Test of Association – level of finance available for maintenance | 123 |
| 4.4.1.2: | Cross Tabulation and Test of Association – level of carefulness of students | 124 |
| 4.4.1.3: | Cross Tabulation and Test of Association – level of issues happens due to lack of knowledge | 125 |
| 4.4.1: | Response rates - Operational and Maintenance factor | 126 |
| 4.4.2.1: | Cross Tabulation and Test of Association – Level of accessibility of students | 128 |
| 4.4.2.2: | Cross Tabulation and Test of Association – Level of accessibility of teachers | 129 |
| 4.4.2: | Response rates - Accessibility factor | 130 |
| 4.4.3.1: | Cross Tabulation and Test of Association – level of IT | 131 |

| | | |
|----------|--|-----|
| | resources availability | |
| 4.4.3.2: | Cross Tabulation and Test of Association – performance level of IT resources | 133 |
| 4.4.3: | Response rates -IT resources factor | 133 |
| 4.4.3.3: | IT resources analysis | 134 |
| 4.4.3.2: | Cross Tabulation and Test of Association – level of financial availability for IT development activities | 135 |
| 4.4.3: | Response rates -Finance factor | 136 |
| 4.4.4.1: | Cross Tabulation and Test of Association – level of motivation from training | 138 |
| 4.4.4.2: | Cross Tabulation and Test of Association – level of motivation from English | 139 |
| 4.4.4.3: | Cross Tabulation and Test of Association – level of motivation to work | 140 |
| 4.4.4.4: | Cross Tabulation and Test of Association – level of motivation than the traditional method | 142 |
| 4.4.4: | Response rates - Motivation factor | 143 |
| 4.5 | Analysis of the relationships to the TAM | 145 |

Abstract

In a developing country, education has become an essential factor for the achievement of a stable economy. A country requires a good and modern education system to produce professionals whose contribution is ultimately to become a strength to the country for its development. Therefore, the investment in education provides a path for economic growth in Sri Lanka for which the responsibility of the government is to provide modern and quality education to every student.

Free secondary education has already been implemented and according to the latest educational statistics, there are 9,662 schools, 212,683 teachers and 3,929,234 students in the country but the current education system is not at an up-to-date standard in using IT.

Information Technology has been already incorporated to the current education system through different methods such as establishing computer labs in schools, educating students and teachers on the use of IT, incorporating IT as a subject in the curriculum, etc. The use of IT tools has been recognized as a new concept and the students get familiar with that technology only in the university environment. Hence, if the student had absorbed the technology during his/her secondary education, he/she would have been more productive in the university environment.

The aim of this study is to find out the factors affecting the use of IT tools for secondary education in Sri Lanka. The IT tools are driving forces to provide quality education to the students. The main human resources of the education system are teachers who teach, guide, instruct and stimulate students to be successful in their future with quality educational qualifications in hand. Special emphasis of this thesis is the perception of teachers on the factors affecting the use of IT tools in teaching & learning process of the secondary education.

The research utilized the survey method and questionnaires were used to collect data from 370 teachers. Interviews were conducted with 7 IT and Non IT teachers as the pilot study and data was collected from 279 teachers (208 Non- IT teachers and 71 IT teachers) from all provinces in the country. A qualitative analysis of questionnaire data and interview data were presented as the outcome of this research.

Findings of this research were categorized into variables in the Technology Acceptance Model (TAM). Analysis was done according to the mapped variables of the TAM and the responses received for each question of the questionnaire. The acceptance of the TAM in secondary education is tested by using the responses to the questionnaire and interview data. As the main out come, very less IT facilities available in schools, the operational and maintenance issues, insufficient training and financial issues negatively affect the smooth operation of secondary education in the use of IT tools. The recommendations given as the outcome of this research can be considered for improvement in the secondary education in Sri Lanka.
