Internal Tutor:..... *UOM Verified Signature*

Dr. Indrika Rajapaksha,
Seniour Lecturer
Faculty of Architecture
University of Moratuwa

ACKNOWLEDGEMENTS

This study became a reality with the help, guidance and encouragement given by the following persons whom I wish acknowledge with deep gratitude.

Archt. Vidura Sri Nammuni Head, Department of Architecture University of Moratuwa for the many intellectually vigorous discussions he had with us both at the undergraduate and postgraduate years of study covering all aspects pertinent to architecture and arts which enabled me to keep in line with the mainstream of architecture even while handling a more scientific study in this dissertation.

I am deeply indebted to my personal supervisor Archt. Dr. Ms. Indrika Rajapaksha senior lecturer of the Department of Architecture for her guidance, valuable comments and unreserved help given to me throughout and to Archt. Dr. Upendra Rajapaksha, senior lecturer and coordinator of M.Sc. dissertations, Department of Architecture for the comments and criticism, which encouraged me to do this study.

Archt. Prasanna Kulatilake, senior lecturer, and the co-year master of the MSc year one Department of Architecture, for valuable comments and unreserved help given during the postgraduate first year, which also showed the formative stages of this study. Archts Gamini Weerasinghe and Jayanath Silva, co-year masters of the MSc year two. My sincere thanks are due to senior lecturers of the Department of Architecture, Dr. Rohintan Emmanuel and Dr. Harsha Moonasinghe for all their valuable comments, guidance and encouragements.

Very special thanks are due to Mr. Chathura - technical officer, Department of Architecture for the assistance given especially in field investigations. The librarian and the library staff of the University of Moratuwa willingly helped me for finding necessary references.

I am specially thankful to Messrs. Sirisena Herath, Deputy Inspector General of the Western province and D. P. L. Dissanayake, Senior Superintendent of Police, Colombo Central Division and the officers of Pettah Police Station for their willing support extended in getting security clearances for field surveys which were done within Colombo's high security zones.

I am also grateful to my senior colleagues Ms. Nirosha Lloyed and Mr Ruwan Silva for the assistance provided and to my friends in need, Jeewanthi, Lasanka Ananda, Chandana, Subodha, Minushi, Rashmin and all my colleagues for their valuable support given.

I express my deepest love and gratitude to my dearest parents, my brothers, Ranjith *mama* and loving Rajju for their encouragement and love and for being with me whenever I needed help. And my special thanks are due to Priyangi *akki* for going through this lengthy document.

Last but not least I express my respect and gratitude to the people who helped me in my field of studies by sharing and articulating their spatial experiences of the urban precincts.

**Tropical Urban Precincts as Socio-Activity Agglomerations
in the context of the Urban Microclimate of Colombo**

INTRODUCTION	xi
A. Significance	xi
B. Intention of Study	xi
C. Study Hypothesis	xi
D. Objectives of Study	xii
E. Scope and Limitations	xii
F. Method of Study	xiii
CHAPTER ONE: THE LIFE BETWEEN BUILDINGS	
Introduction to the Chapter	01
1.1 Life between buildings: "city life"	02
Life between buildings - and the need for contact.	
1.2 City life and Architectural trends	03
1.3 Urban space as an Architectural Enclave	05
1.3.1 Urban Space	05
1.3.2 Architectural characteristics of Urban Space	05
1.3.2.1 Sense of enclosure	06
1.3.2.2 Sense of direction	06
1.3.3 Out door activities and the Quality of outdoor space: Urban space	06
1.4 Sense of comfort ness	08
1.4.1 Visual and Acoustic Comfort	09
1.4.1.1 Visual Comfort	09
1.4.1.2 Acoustic comfort	09
1.4.2 Thermal Comfort: The Key Facilitator of Physical Comfort	10
1.4.3 Acclimatization	11
1.5 Thermal Comfort- Theoretical Basis	11
1.5.1 Architecture and Thermal Comfort	12
1.5.2 Urban comfort controlling factors	14
1.5.2.1 Natural factors	14

1.5.2.2	Anthropogenic factors	14
1.5.2.3	Air pollution	15
1.5.2.4	Urban surface materials	15
1.5.2.5	Emissions of anthropogenic heat	15
	Concluding remarks	16

CHAPTER TWO: URBAN DESIGN AND ITS EFFECTS ON URBAN CLIMATE

Introduction to the Chapter

2.1	Urban Climatology	17
2.1.1	Climate Zones	17
2.1.2	Urban Temperature: The Heat Island Phenomenon	18
2.1.3	Atmospheric pressure and Urban Wind Field	19
2.1.4	Radiation and Sunshine	21
2.2	Urban Design Effects on Thermal Behaviour of Urban City	21
2.2.1	The location of a town within a Region	21
2.2.2	Size of cities	22
2.2.3	Density of the built- up area	22
2.2.4	Land coverage	22
2.2.5	Anthropogenic factors	22
2.2.6	Intensity of activities and type of clothing	23
2.3	Colombo: Urbanization and Heat Island	24
2.3.1	Urbanization the city Of Colombo	24
2.3.2	Colombo City as an Urban Heat Island	26
2.4	Climatic Characteristics of Sri Lanka	27
2.4.1	Climate Change Predictions in Sri Lanka	28
2.5	Problems related to Colombo City Microclimate	28
	Concluding Remarks	29

CHAPTER THREE: URBAN PRECINCTS AS SOCIO-ACTIVITY AGGLOMERATIONS

Introduction to the Chapter	30
3.1 Urban Precinct: <i>"the Highly Populated Urban Pockets"</i> .	31
3.2 Urban Precinct as an Architectural Enclave	31
3.2.1 Sense of enclosure	31
3.2.2 Sense of direction	32
3.2.3 Sense of comfort ness	32
3.3 Urban Precinct Geometry	33
3.3.1 Geometry effects on Thermal Behaviour of Urban Precincts	33
3.3.2 Aspect Ratio	34
3.3.3 Sky View Factor (SVF)	35
3.3.4 Albedo effect and Radiation	36
3.3.5 Urban density and the characteristics of urban wind field	37
3.4 Characteristics of Urban precinct activities.	40
3.4.1 Activity pattern	40
3.4.2 Activity levels and human comfort	41
3.4.3 Clothing	42
3.5 The Limits of acclimatization	43
Concluding Remarks	44

CHAPTER FOUR: CASE STUDIES OF URBAN PRECINCTS

Introduction to the Chapter	45
4.1 Approach to the Research	45
4.2 Methodology	46
4.2.1 Site Selection	46
4.2.2 Equipment used	48
4.2.3 On-site spot measurement, activity pattern and clothing observations	49
4.2.4 Data classification	50
4.2.4.1 Climatic data	50
4.2.4.2 Observation data and photographic study	50
4.3 Method of analysis	50
4.3.1 The Thermal Heat Index	50
4.3.2 Predicted Mean Vote	51
4.3.3 Comfort Zone	51

4.3.4 Over all comparison of the comfort pattern and the activity patter	52
4.3.5 Synthesis of designated and significant character of the precinct	52
4.5 Case study	
4.5.1 Old Town Hall Precinct	53
4.5.1.1 Precinct as an Architectural enclave	53
4.5.1.2 Observations	58
4.5.1.3 Concluding remarks	69
4.5.2 Bo-Tree Precinct	71
4.5.1.1 Precinct as an Architectural enclave	73
4.5.1.2 Observations	75
4.5.1.3 Concluding remarks	87
4.5.2 Jami Ul Alfar mosque Precinct	88
4.5.1.1 Precinct as an Architectural enclave	90
4.5.1.2 Observations	92
4.5.1.3 Concluding remarks	103
CHAPTER FIVE: CONCLUSION	
5.1 Setting the Frame	105
5.2 Summary of Case Study Findings	106
5.3 Design Guidelines	107
5.4 Directions for Further Research	109
BIBLIOGRAPHY	110
APPENDICES	113

LIST OF ILLUSTRATIONS

Figure no.	Description	Page no.
Chapter one		
1.1	York Street 1910, Fort	01
1.2	City life at Pettah	02
1.3	People gather where people are, Petta in early 19th century.	03
1.4	Revolutionary city form	04
1.5	Sense of enclosure*	06
1.6	Sense of direction	06
1.7	The vast realm of public activities*	07
1.8	Physiological and Psychological Parameters involved in the interaction of man and his environment	08
1.9	Vitruvian Tri-parite of climate balance	12
1.10	Interlocking fields of environment	12
1.11	Bio climatic chart	12
1.12	Seven point Numerical Scale	13
Chapter Two		
2.1	Urban Heat Island Phenomena	19
2.2	Climate pattern relation to altitude and the radiation	21
2.3	activity types and metabolic rates	23
2.4	typical <i>c/o</i> values	23
2.5	Arial view of Pettah, Sri Lanka	24
2.6	Thirty-year diurnal variations in temperature during the hottest month in CMR	25
2.7	Historical trends in Heat Index - Colombo Weather station	26
Chapter Three		
3.1	Well-enclosed urban space. Siena, Barcelona	31
3.2	Sense of Direction, Louvre Museum, Paris, France	32
3.3	People prefer to stay long when it comfortable Dublin, Ireland	32
3.4	Various types of precincts and there geometry	33
3.5	Precinct Geometry is important as the life within, New Castle, UK.	34
3.6	Radiation effect on a precinct reference to its aspect ratio	35
3.7	Sky View Factor (SVF)	36
3.8	Wind patter, when perpendicular to the precinct.	37
3.9	Wind pattern	37
3.10	Wind flow direction parallel to the Long Axis	38

Figure no.	Description	Page no.
3.11	Single vortex pattern	37
3.12	Double vortex pattern	39
3.13	Oblique winds	39
3.14	Necessary activities	40
3.15	Optional activities	41
3.16	Social activities	41
Chapter Four		
4.1	Area map of identified precincts	47
4.2	Old Town Hall precinct lay out with imposed grid	54
4.3	Precinct as an urban space	55
4.4	The lay out of precinct with imposed grid	58
4.5	Vividness of activities	58
4.6	Air temp. variation of OTP during 1200 to 1430 Hrs.	59
4.7	Distribution of air temp., OTP	60
4.8	Distribution of RH., OTP	60
4.9	Distribution of illuminance., OTP	61
4.10	THI Distribution of OTP	61
4.11	PMV Distribution of OTP	62
4.12	Sitting Distribution of OTP	63
4.13	Standing Distribution of OTP	64
4.14	Moving Distribution of OTP	63
4.15	The lay out of precinct BTP	71
4.16	Bo-Tree junction precinct lay out with imposed grids	72
4.17	Air temp. variation of OTP during 1200 to 1430 Hrs.	73
4.18	Bo Tree- the activity agglomeration	74
4.19	The entrances frames the directions	74
4.20	Precincts provide centre for long distance travellers	74
4.21	BTP lay out with the imposed grid	75
4.22	Activity shows vast vividness	75
4.23	Air temp. variation of BTP during 1200 to 1430 Hrs.	76
4.24	Distribution of air temp., BTP	77
4.25	Distribution of RH., OTP	77
4.26	Distribution of illuminance., OTP	78
4.27	THI Distribution of OTP	78
4.28	PMV Distribution of OTP	79
4.29	Sitting Distribution of OTP	79

4.30	Standing Distribution of BTP	81
4.31	Moving Distribution of BTP	82
4.32	Lay out of the precincts	88
4.33	Jami-ul-AlfFah mosque Lay out	89
4.34	Jami-ul-AlfFah mosque Street elevations	89
4.35	Precinct can be Identified as a junction	90
4.36	Court yard used for praying and services	90
4.37	Every space is well inter connected	91
4.38	The sense of comfort	91
4.40	Vividness of activities	92
4.41	Air temp. variation of JMP during 1200 to 1430 Hrs.	92
4.42.	Distribution of air temp., BTP	93
4.43.	Distribution of RH., JMP	94
4.45	Distribution of illuminance., JMP	94
4.46	THI Distribution of JMP	95
4.47	PMV Distribution of JMP	96
4.48	Sitting Distribution of OTP	97
4.49	Standing Distribution of JMP	98

LIST OF TABLES

Table no.	Standing Distribution of OTP	Page no.
Chapter Two		
2.1	Population statistics of Pettah, Sri Lanka	25
Chapter Three		
3.1	Total heat production rate in human being	42
3.2	Heat resistance and typical clo values(ISO 7730)	42
Chapter Four		
4.1	The case study precinct description.	46
4.2	The equipment used in climatic data measuring	49
4.3	The type of measurement and relevant equipment	50
4.4	Comparison of THI and activities – Sitting Posture	65
4.5	Comparison of THI and activities -Standing Posture	66
4.6	Comparison of THI and activities -Moving	67
4.7	Comparison of PMV and activities – Sitting Posture	68
4.8	Comparison of THI and activities – Sitting Posture	83
4.9	Comparison of THI and activities -Standing Posture	84
4.10	Comparison of THI and activities -Moving	85
4.11	Comparison of PMV and activities – Sitting Posture	86
4.12	Comparison of THI and activities – Sitting Posture	99
4.13	Comparison of THI and activities -Standing Posture	100
4.14	Comparison of THI and activities -Moving	101
4.15	Comparison of PMV and activities – Sitting Posture	102
