DECLARATION OF THE CANDIDATE AND SUPERVISOR

I declare that this is my own work and this thesis/dissertation does not incorporate without acknowledgement any material previously submitted for a Degree or Diploma in any other University or institute of higher learning and to the best of my knowledge and belief it does not contain any material previously published or written by another person except where the acknowledgement is made in the text.

Also, I hereby grant to University of Moratuwa the non-exclusive right to reproduce and distribute my thesis/dissertation, in whole or in part in print, electronic or other medium. I retain the right to use this content in whole or part in future works (such as articles or books).

ABSTRACT

The aim of this research is to investigate the possibility and requirement of devising the use of the one piece flow to increase operational performance.

The empirical research is used to understand the reasons for outsourcing 3PL providers to utilise the concepts continuous flow in an apparels finished goods hub operation. Moreover the paper discusses the aspects of continuous flow in terms of information and material flow and applying theories of Value Stream, Layout and the one piece flow. A quantitative study is conducted focused on professionals from apparels finished goods hub operations. Thereafter operational performance is defined and elaborated with specific and relevant indicators i.e. KPIs.

The results indicated that the knowledge and understanding of the 3PL professionals to be at a high level in terms of continuous flow and its contribution towards operational performance. However several key concerns were also highlighted which hindered the implementation of the concepts discussed.

The experience of the 3PL service provider in this study provides insights and promote the benefits of continuous flow that can enhance warehouse performance which will contribute to improve Sri Lankan national productivity.

ACKNOWLEDGEMENT

I would convey heartiest gratitude to my research supervisor Ms. Harishani liyanage, lecturer of the Department of Transport and Logistics Management, University of Moratuwa for the guidance and the encouragement given in carrying out research. Also, my gratitude extends to the research coordinator Mrs. Thivya Amalean for giving direction and guidance to carry out the research.

I extend my gratitude to Prof. Amal Kumarage, Head of the Department of Transport and Logistics Management of University of Moratuwa, and all the academic staff members for providing the knowledge and skills throughout the degree program that supported to carry out the research and providing an opportunity to expose to research.

Also, I would like to convey my gratitude to professionals from Apparel warehouse industry, in different organizations and for the people who provided me with contacts in the related industry for helping me to collect data and information to carry out the research project. Without their immense support, this research would not be a reality.

Furthermore, I convey my sincere gratitude to my family members, batch mates, colleagues, friends who supported me to make this research a success and to everyone who supported me with a mere word, encouragements, advices and opinions when bringing this study into a reality.
