

LIQUID ARCHITECTURE: HYPERSURFACE AS AN ARCHITECTURAL IDIOM

Dissertation Presented to the
Department of Architecture,
University of Moratuwa
For the Master of Science
Examination
In Architecture

Tilanka Chandrasekara
M.Sc. Architecture –Year Two
Faculty of Architecture
University of Moratuwa

2006

89493

Acknowledgements

The realization of this dissertation would have been impossible if not for the support, encouragements, and criticisms of many. I am indeed deeply grateful to all of them

First and foremost I would like to thank Prof. Samitha Manawadu, Head of the Department of Architecture, for guiding me in order to refine my dissertation topic as well as for the critical remarks which were the foundations on which this dissertation is based upon.

I would also like to thank Archt. (Dr.) Harsha Munasinghe, for his guidance and opinions both as the Year master and as the dissertation coordinator.

It is with great pleasure that I render a vote of gratitude towards my Dissertation tutor, Archt. Sudharshana Wijegunawardena, for his guidance, opinions, criticisms, and encouragements without which this dissertation would have never seen an end to.

A heartfelt word of gratitude also is due to Archt. (Dr.) Jagath Munasinghe, who encouraged and guided me from the inception in achieving my goal.

I take this opportunity to thank Archt. (Dr.) Upendra Rajapakse who from the beginning, made critical comments and encouraged me and also for lending materials which were invaluable assets in nourishing this dissertation.

I would also like to thank Archt. Ravin Gunaratne, for taking time to reply my emails, and helping me throughout in order to structure my dissertation and rectify what I had left out.

I very much thank Archt. Upendra Randeniya, Prof. Rohinton Emanuel, and Archt. Susira Udalamatte, for their guidance and critical comments.

A vote of gratitude is also due to Ven. Rev. Thelebugamma Chandananada, for his insight, guidance and opinions related to the study area.

I would also like to thank Archt. Prashant Das, and Archt. Frank Snerling for their critical comments, ideas, and guidance through out.

I take this opportunity to thank Archt. Gamunu Perera and Eng. George Perera for their time and help rendered.

I consider it a privilege also to thank the lady at the reference library who had the patience to photocopy large amounts books for me when ever I asked, without complaint.

I would like to thank kinkini for all the support, encouragement, "Thoughtful words", and inspiration, but mostly for making the world seem a little bit brighter than it really was. Thank you.

Last but definitely not the least, I thank my parents for without whom, none of this would have ever been possible. Your guiding light shines far beyond comprehension. Thank you.

List of Contents		iv
List of Illustrations		viii
Introduction		1
Topic Explanation		2
The need and intention of the study		3
Scope and limitation		5
Method of study		6
Chapter One		
Realm of the veracious: Perceiving Architecture		
Preface	 University of Moratuwa, Sri Lanka. Electronic Theses & Dissertations www.lib.mrt.ac.lk	8
1.1 Space		9
1.11 Space Defined		9
1.12 Concepts of Space		9
1.2 Perceiving Space		12
1.21 Sensation, Perception and Cognition		12
1.22 Spatial Perception: Introduction		13
1.23 Perceiving space		13
1.3 Comprehending Space		15
1.31 Experiencing space using vision		17
1.32 Experiencing space using different senses		18
1.33 Synesthesia		20
1.34 Experiencing space using abstractions and language		21
1.4 Expressing Space		23
1.41 Scale		23
1.42 Reference frames		27
1.43 Perspective of describer		28

1.5	Architecture and Place	29
	1.51 Place	30
	1.52 Place making	32
	1.53 Making the Place	33
1.6	New Techniques in Representing Architectural Space and Place	35
	Summery	37
	Reference	38

Chapter Two

Sanctum of Reverie: Architecture Redefined

	Preface	39
2.1	From Physical to Virtual	40
	2.11 Spatial evolution	40
	2.12 New social space	41
	2.13 Virtual space	43
	2.14 Physical space	44
2.2	The Digital space	46
	2.21 Architectural evolution	46
	2.22 Perceiving digital space	47
	2.23 Diagrams in digital space	48
	2.24 Forms in digital space	49
2.3	Digital Architecture	50
	2.31 Liquid architecture	50
	2.32 Hypersurface	52
	2.33 Realizing Virtuality	55
	2.331 Emergence of virtual space	56
	2.332 Philosophical foundations	59
2.4	Dynamism in Architecture	62
	Summery	64
	Reference	65

Chapter Three

The Molten Cadence: Dynamism in Architecture

Preface	67
3.1 Materializing Dynamism	68
3.2 The Moving surface	70
3.11 Defining the Moving surface	70
3.12 Perceiving the Moving surface	75
3.3 Interactive surface	78
3.21 Defining the Interactive surface	78
3.22 Perceiving the Interactive surface	82
3.4 Intelligent Architecture	83
3.31 Defining the Intelligent building	83
3.32 Perceiving Intelligence	86
3.5 Virtual Architecture	88
3.51 Virtuality	89
3.52 Virtual space	89
3.521 Defining virtual space	89
3.522 Virtual reality as a artistic medium	91
3.523 Perceiving virtual space	93
3.53 Cyberspace	95
3.54 Cyber environments	97
3.541 Hyper reality	97
3.542 Abstract reality	99
3.543 Hybrid cyberspace	101
3.544 Hybrid virtuality	102
3.45 Criteria for cyber place making	103
Summery	106
Reference	107

Chapter Four

Scrutiny of Datum: Case Study

4.1 Prada showroom- Rem Koolhaas- New York-USA	108
4.2 The Water Pavilions-Lars Spuybroek and Kas Oosterhuis-Denmark	114
4.3 HNB Building-Gamunu Perera-Colombo-Sri Lanka	121
4.4 Acnipark- Selectparks-Cyberspace	131
Reference	141

Chapter Five

Shifting sands: Changing role of the Architect

Preface	142
5.1 Digital Architect	144
5.2 New practice in architecture	145
5.3 Hybrid Structures	148
5.4 Digital Aesthetics	149
Summary	151
Reference	152
Conclusion	153
Bibliography	156
