**This report of the study submitted to the Department of Mathematics,
University of Moratuwa, Sri Lanka in partial fulfillment of the
requirements of the degree of Master of Science
in Operational Research.**

This is to certify that the research report on An Econometrics Analysis of the Relationship between the Nominal Money Supply, National Output and the General Price Level of Sri Lanka, is submitted to the Department of Mathematics, University of Moratuwa, Sri Lanka in partial fulfillment of the requirements of degree of Master of Science in Operational Research.

ACKNOWLEDGMENT

I acknowledged with utmost gratitude in mind, the proper direction, encouragement and support extended to me by the Coordinator of the MSc Programme and the supervisor of this study Dr. M. Indralingam, Head , Department of Mathematics, University of Moratuwa.

Further, my indebted gratitude and thanks go to the supervisor of this study Dr R. Lokupitiya, Senior Lecturer in the Department of Mathematics, University of Moratuwa for his dedicated guidance, encouragement and support in many stages of carrying out this research study successfully.

CONTENTS

CHAPTER	PAGE
1. INTRODUCTION	1
1.1 Introduction to the study	1
1.2 Objective	3
1.3 Methodology	3
1.4 Limitations	3
1.5 Organization of report	4
2. CONCEPTUAL FRAMEWORK AND METHODOLOGY	5
2.1 Theoretical Background	5
2.1.1 The Quantity Theory of Money	5
2.1.2 Fisher's Equation of Exchange	6
2.1.3 Income Version the Quantity Theory	9
2.2.4 Critical Evaluation of QTM	10
2.1.5 Equation of Exchange and Friedman's Revised Quantity Theory	12
2.2 Findings of Similar Studies	17
2.3 Conceptualization	18
2.4 Development of Hypothesis	19
2.5 Definition of variables	20
2.5.1 Price Level	20
2.5.2 Real Gross National product / Real National Output (GNPR)	20
2.5.3 Nominal Money Supply (NMS)	21
2.6 Method of analysis	21
3. MULTIPLE REGRESSION THEORY	24
3.1 Multiple Regression	24
3.2 Assumptions of the regression	27
3.2.1 Stochastic Assumptions	27
3.2.2 Other Assumptions	28
3.3 Autocorrelation	29
3.3.1 Cochrane - Orcutt Iterative Procedure	30
3.4 Multicollinearity	31

4. ANALYSIS AND FINDINGS	33
4.1 Regression Analysis	33
4.2 Examining the Assumptions	35
4.2.1 Constant Variance (Heteroscedasticity)	35
4.2.2 Presence of Outliers	36
4.2.3 Non-independence of Error Terms (Autocorrelation)	37
4.2.4 Non-normality of Error Terms	38
4.3 Testing for Autocorrelation	39
4.4 Elimination of Autocorrelation	41
4.5 Autocorrelation in Transformed Data	43
4.6 Testing for Multicollinearity	45
5. DISCUSSION OF FINDINGS	47
5.1 The possible reasons for not finding negative relationship with real output	47
5.1.1 The Possible Errors in the Calculation of the Real Output	47
5.1.2 The validity of the assumption of the Quantity Theory of Money	48
5.1.3 Incorrect equation form	49
5.1.4 Time Period Problems	49
5.2 The possible reason for strong positive relationship with nominal money supply	50
6. CONCLUSION AND RECOMMENDATIONS	51
6.1 Summary Conclusion	51
6.2 Possible Extensions to this Study	51
6.3 Implications to the government/policy makers	52
REFERENCES	53
APPENDIXES	54
Appendix 1 Original data and log values of GNPR, NMS and CCPI (1952-2000)	54
Appendix 2 Minitab output of cochrane-ortcutt iterative procedure	56
Appendix 3 Autocorrelation eliminated data	60
