**THE ESTIMATION OF
PROBABLE MAXIMUM PRECIPITATION
FOR
SRI LANKA**

By

W.C.D.K. FERNANDO

B. Sc. Engineering

Supervised by

University of Moratuwa, Sri Lanka
Electronic Theses & Dissertations
Prof. S. S. Wickramasuriya

A dissertation submitted to the Department of Civil Engineering
University of Moratuwa, in partial fulfillment of the requirements
of the Master of Engineering Degree in
Environmental Water Resources Engineering and Management, 2001

University of Moratuwa

83817

DECLARATION

The author wishes to declare that the content and the outcome of this thesis are from her original work, except for commonly understood ideas and duly acknowledged references.

She also wishes to declare that the work has not been previously submitted, in part or in whole to any other university or equivalent institution for the award of any degree, diploma or any other qualification.

The work described in the thesis was carried out under the supervision of Prof. S. S. Wickramasuriya.

TABLE OF CONTENTS

List of Figures	iv
List of Tables	v
Acknowledgement	vii
Abstract	viii
Chapter One - Introduction	
1.1 General	1
1.2 Study Areas	2
1.3 Objectives of the study	7
Chapter Two - Background Information on PMP	
2.1 Introduction	8
2.2 Methods of Estimating PMP	8
2.3 Summary	13
Chapter Three -Literature Survey	
3.1 Survey of recently published work on PMP	15
3.2 Summary	19
Chapter Four - Climate of Sri Lanka	
4.1 Introduction	21
4.2 The Asian monsoon	21
4.3 Rainfall	22
4.4 Wind	26
4.5 Dew-point Temperature	28
4.6 Wet bulb Temperature	29
4.7 Air Temperature	30
4.8 Sea Surface Temperature	
Chapter Five - Methodology	
5.1 Introduction	32
5.2 Method used in Storm Maximization	32
5.3 Method used in Statistical Analysis	36
5.4 Summary	39

Chapter Six - Data Presentation	
6.1 Introduction	40
6.2 Geographical Data	40
6.3 Meteorological Data	41
6.4 Difficulties in Conducting Research on PMP	48
Chapter Seven - Data Analysis	
7.1 Introduction	50
7.2 Analysis in Storm Maximization	50
7.3 Statistical Method	56
Chapter Eight - Results and Discussion	
8,1 Introduction	62
8,2 Discussion on Storm Maximization	62
8.3 Discussion on Statistical Analysis	64
8.4 Comparison of Storm Maximization and Statistical Analysis	66
8.5 Main Findings	67
Chapter Nine - Conclusions	
9.1 Main Conclusions	69
9.2 Recommendations for Further Research	70
List of References	71
Annex 1	74
Annex 2	79
Annex 3	83
Annex 4	90

LIST OF FIGURES

No.	Description	Page
1.1	Location of Anuradhapura and Ratnapura in Sri Lanka	3
4.1	Average annual rainfall	23
6.1	Annual maximum daily precipitation in Anuradhapura (1951 – 2000)	41
6.2	Annual maximum daily precipitation in Ratnapura (1951 – 2000)	42
6.3	Monthly averages of dew-point temperature in Anuradhapura (1951 – 2000)	45
6.4	Monthly averages of dew-point temperature in Ratnapura (1951 – 2000)	45
7.1	24-hour persisting dew-point temperature in Anuradhapura (1951 – 2000)	52
7.2	24-hour persisting dew-point temperature in Ratnapura (1951 – 2000)	53

University of Moratuwa, Sri Lanka.

LIST OF TABLES

No.	Description	Page
1.1	Major Dam Failures	2
1.2	The variation of average seasonal rainfall	4
1.3	Details of the breached tanks in Anuradhapura due to 1957 flood	5
1.4	The variation of monthly mean seasonal precipitation in Ratnapura	6
4.1	Average seasonal rainfall (1961 – 1990)	24
4.2	Mean seasonal distribution of rainfall at selected stations	24
4.3	The maximum daily point rainfalls recorded at selected meteorological stations	25
4.4	Yearly means of daily wind mileage (1931 – 1960)	26
4.5	Percentage of wind directions in Anuradhapura	27
4.6	Monthly averages of Radiosonde data	28
4.7	Extreme wet bulb temperatures in 1974, Lanka	29
4.8	Monthly mean maximum wet bulb temperatures (1931 – 1960)	30
4.9	Annual average of monthly mean air temperatures (1931 – 1960 and 1960 – 1990)	30
4.10	Monthly mean sea surface temperature (1901 – 1988)	31
6.1	Geographical data at Anuradhapura and Ratnapura	40
6.2	Major storms occurred at Anuradhapura (1951 – 2000)	42
6.3	Major storms occurred at Ratnapura (1951 – 2000)	42
6.4	Variation of the most significant storm in Anuradhapura	43
6.5	Variation of the most significant storm in Ratnapura	43
6.6	Daily wind run at Anuradhapura in NE-NW quadrant	46
6.7	Daily wind run at Ratnapura in N and NW directions	47
6.8	Sea surface temperatures in June and December	47
7.1	Observed point rainfall greater than 200mm/day at Anuradhapura	50
7.2	Observed point rainfall greater than 300mm/day at Ratnapura	51
7.3	Moisture maximization factors for Anuradhapura and Ratnapura	55

7.4	Wind maximization factor for selected stations	55
7.5	Estimated PMP for selected stations	56
7.6	Statistical analysis in Anuradhapura – sample size 20	56
7.7	Statistical analysis in Anuradhapura – sample size 30	57
7.8	Statistical analysis in Anuradhapura – sample size 50	58
7.9	Statistical analysis in Ratnapura – sample size 20	59
7.10	Statistical analysis in Ratnapura – sample size 30	59
7.11	Statistical analysis in Ratnapura – sample size 50	60
8.1	Summary of statistical analysis in Anuradhapura	64
8.2	Summary of statistical analysis in Ratnapura	65
8.3	Comparison of PMP in Anuradhapura and Ratnapura	66
